INTRODUCTION

Strategic planning is a systematic approach to determining an institution's or organization's future. This process proposes specific plans which target five-year goals based on fundamental principles, institutional characteristics, and external factors. These goals emerge from the institution's philosophy and mission, and are achieved by strategies and action plans outlining specific operational tactics.

While the process of strategic planning varies depending on institutional culture and leadership style, effectiveness in planning methods requires certain common elements. These elements are incorporated into the Southeastern Baptist College Five-Year Plan by the following components:

1. Philosophy - values, beliefs, and underlying assumptions which serve to establish parameters that define the character and nature of the institution.
2. Mission - a concise statement of the institution's purpose.
3. Strategic Goals - indicators of success in accomplishing the institution's mission.
4. Strategies - general commitments to address certain key success factors and critical issues in order to accomplish the institution's mission and goals.
5. Financial Projections- financial resources available to implement action plans.
6. Action Plans - specific recommendations for implementing strategies.
7. Evaluation - monitoring and assessing the progress of the Five-Year Plan.

PHILOSOPHY

Bible colleges have at least three distinctives: first, a Bible college exists for the purpose of training Christian workers; second, Bible college training emphasizes practical experience; and third, the Bible college curriculum emphasizes biblical studies.

The trustees, administration, and faculty of Southeastern Baptist College are committed to maintaining those distinctives for the institution. Therefore, they consider the spiritual, as well as, the academic qualifications of students. It is their conviction that a right relationship with God is the first step in the pursuit of knowledge.

Southeastern Baptist College reflects the teachings of the Bible from the Baptist viewpoint. However, free and open discussion of opposing views by faculty and students is encouraged. The college recognizes that only those teachings which can stand the test in a free market of ideas are worthy of their advocates.

MISSION

The purpose of Southeastern Baptist College is to glorify God by providing quality post-secondary education from a biblical world view in a Christian atmosphere, thereby developing Christian growth in students and preparing them for service in the Kingdom of God.

Southeastern Baptist College seeks to prepare men and women in the Christian community expressing a desire to be involved in a church-related vocation. Training is provided on campus and through extensions to help prepare people for ministry in the pastorate, missionary work, music ministries, Christian education, and youth and adult ministries.

Southeastern Baptist College also seeks to train people who wish to receive the foundational courses of the college curriculum in a spiritual academic setting as provided by the college. All courses are taught in such a manner as to integrate faith and learning, thereby giving due recognition to the God of all truth.

Southeastern Baptist College seeks to serve the Christian community by offering a limited number of credit and non-credit courses to those who do not choose to pursue a structured program toward a specific degree, certificate, or diploma.

STRATEGIC GOALS

1. Southeastern Baptist College graduates will be able to state unreservedly that the Bible is the inspired Word of God, and that it is the standard of their faith, practice, and conduct.
2. Southeastern Baptist College graduates will demonstrate that they have acquired a basic knowledge of the Bible necessary for intelligent Bible study.
3. Southeastern Baptist College graduates will demonstrate that they have gained a degree of maturity in their Christian experience as reflected in their communication, their observable behavior, and their initiative and performance in Student Ministries assignments.
4. Southeastern Baptist College graduates will demonstrate evidence of cultural refinement in terms of communicative skills, appreciation of the arts, and social etiquette.
5. Southeastern Baptist College graduates will give evidence of having been stimulated toward continued growth in biblical knowledge, Student Ministries, Christian citizenship, and scholarly competence as reflected in records which give comparative evidence of progress.

STRATEGIES

1. We will pursue continued growth in enrollment through intensified recruiting efforts.
2. We will endeavor to enhance the college's public image through continued and new public relations efforts.
3. We will endeavor to increase revenue through continued appeals to traditional sources and initial appeals to new sources.
4. We will endeavor to maintain high quality physical facilities and equipment as needed to accomplish our mission.
5. We will endeavor to offer high quality educational programs through continued upgrading of academic programs.
6. We will endeavor to maintain an adequate library to support the courses being taught.
7. We will endeavor to maintain high quality of service to students through selective employment and continuing support of college personnel.
8. We will endeavor to provide a positive educational experience for students through ongoing attention to student services.

SUMMARY

The Five-Year Plan was developed with consideration given to internal and external factors that are believed to be crucial to the ability of the college to accomplish its mission. Those factors include:

1. Organization

Strengths - features of the institution that contribute to the accomplishment of its mission and goals.

Weaknesses - features of the institution that inhibit the accomplishment of its mission and goals.

2. Environment

Opportunities - features of the environment that contribute to the accomplishment of the institution's mission and goals.

Liabilities - features of the environment that inhibit the accomplishment of the institution's mission and goals.

3. Current Position

Success Factors - features of the institution and/or environment that significantly affect the institution's ability to accomplish its mission and goals.

Critical Issues - areas of concern that significantly affect the institution's ability to accomplish its mission and goals.

The following pages give a summary of the conclusions reached with respect to the college's strengths and weaknesses, the environment's opportunities and liabilities, and the institution's current position in terms of success factors and critical issues.

STRENGTHS

We believe the following aspects of the college show an encouraging picture for its future well-being.

- The administration, faculty, and staff are considered to be strengths. Their length of service to the college, commitment to the mission of the college, and qualifications for their respective areas of responsibility all serve to give stability and quality to the program.
- The educational environment at the college is considered to be a positive asset. The combination of a strong academic program and an intense Christian emphasis provides a special opportunity for students who want such a balanced experience in a college setting. This is especially so in an area of the country known as "the Bible Belt," and where Christian values remain strong in the society.
- Recent campus improvements and beautification projects have strengthened the college's image with prospective students, the supporting constituency, and the local community. The campus improvement process is ongoing and should continue to strengthen the college's appeal.
- A small student-faculty ratio fosters attractive classroom experiences and promotes positive relationships between students and faculty.
- The cost of attendance at the college is comparatively low for a private institution. Other private colleges in the state are three times more expensive than Southeastern.

WEAKNESSES

We believe the following aspects of the college are inhibitors to success, but that they are controllable.

- Student enrollment is very small. Without growth in enrollment, the college is limited in its ability to generate needed financial income, to produce an alumni support base, and to impact the lives of more students in the accomplishment of its mission.
- Even though the combination of a strong academic program with an intense Christian environment is desirable, the college continues to have the image of just being a "preacher's school." The average parent and prospective student do not perceive of Southeastern as an option for the first two years of post-secondary education.
- Limited financial resources continue to present a primary hindrance to progress. This contributes to low faculty and staff salaries, limitations on improvement to and expansion of physical facilities, and difficulty in acquiring equipment.
- Low retention is recognized as a weakness, and steps are being pursued to correct the problem.

Addressing these weaknesses will be an ongoing process implementing the strategic plan in the years to come.

OPPORTUNITIES

Opportunities in today's world abound for the educational world. Trends in the environmental climate point to increasingly favorable circumstances for the college.

- The emphasis in our nation and state on education constantly keeps its importance before the eyes of the public. Efforts to make higher education a reality for all citizens will no doubt help to bring all educational institutions into a more favorable marketplace.

- The college's location in the "sunbelt" is a positive factor in terms of an increasing population. The mild climate and relatively low cost of living in the region make future population growth a strong probability.

- The economic trend of the nation and state indicates that more people are seeking new/additional avenues for employment now more than ever before. The promotion of our current academic programs and the creation of new programs at our institution will offer the public possibilities for educational training.

These environmental opportunities suggest an optimistic future for continued growth of the college.

LIABILITIES

Certain environmental factors present difficulties for the college to advance in some areas.

- The number of churches comprising the supporting denomination is small. Additionally, most of the churches are small themselves. This presents a limitation on the potential recruiting pool they provide.
- The state has an extensive community college system. Most residents in the state live within a fairly short driving distance of a public community college. Because of governmental assistance, these community colleges offer very inexpensive tuition. Also, most students reside close enough to live at home if they wish to do so.
- Several public colleges and universities in the state do not recognize ABHE accreditation. All three of the major universities will not accept transfer students from Southeastern.

Every environment has its own particular liabilities for educational institutions. Recognizing those liabilities helps in planning to minimize their negative impact.

SUCCESS FACTORS

Success factors deduced from analysis of strengths, weaknesses, opportunities, and liabilities include recruiting, public relations, funding, and campus improvement. To accomplish its mission, Southeastern Baptist College must succeed in each of the following areas.

- Intensified recruiting will result in continued growth in enrollment.
- Improved public relations will help increase public awareness and support.
- Increased funding will provide support for continued quality programs.
- Improvements to campus buildings, grounds, and equipment will contribute to the overall strength of the college.
- Improve retention will be a stabilizing factor in enrollment.

CRITICAL ISSUES

Critical issues identified through internal and external analyses include growth, image, and continued accreditation. These issues must be given high priority attention for continued stability of the college.

- Growth in enrollment must occur for the college to more effectively accomplish its mission.
- Image must be accurately conveyed to improve awareness of programs offered and quality of service provided.
- Continued accreditation must be achieved to ensure public credibility and the existence of the college itself.

EVALUATION

The college administration recognizes the need to continually evaluate the progress being made as the Five-Year Plan is implemented. The following is a guideline to be followed in the evaluation of the institutional effectiveness as it relates to the Five-Year Plan.

- In the summary of each year of the Five-Year Plan, the Planning/ Assessment, Committee, administration and faculty shall set a time to discuss the action plans for that year and specific ways each individual will contribute to making the plans reality.
- Individuals involved directly in the areas of action will be given a time-line for reporting on the progress of the action plan to ensure that its implementation is on schedule. These reports will be given to the person(s) responsible for the action plan.
- At the conclusion of each year of the Five-Year Plan, the administration and faculty shall set a time to report on the outcomes of the action plans for that year. Successes shall be noted, and areas that were not completed will be discussed giving consideration to causes for the lack of accomplishment and actions that might be needed as a result.

All assessment will be made based on how effective the institution was in accomplishing the strategic goals set forth in the Five-Year Plan utilizing the action plans set forth therein.

Plans will also be finalized at this time for a year to be added to the end of the five-year cycle, thus ensuring that plans for a five-year period will always be in effect.
